Pollution Control Board, Assam,
Bamunimaidam, Guwahati

Sub: Prayer for your kind intervention to protect our fundamental right to live in a pollution free environment guaranteed under Article 21 of the Indian Constitution.

Date: 25/10/2023

Respected Sir,

With due respect and humble submission we would like to inform you that we are the inhabitants of **Mayong in the Morigaon district** of Assam. We have been continuously suffering from the mischievous activities of an industrialist who is trying to snatch away our fundamental right to live in a pollution free environment. Therefore, we want to inform you-

1. That, a businessman Mr. Dilip Chetry has been continuously trying to establish a brick kiln (Proposed BBA Bricks) in the vicinity of **Sativeti village at Mayong, Morigaon,** Assam. The villagers have been continuously raised their objections through various petitions. The inhabitants of the area believe that the proposed coal based brick kiln will create serious health hazards including diseases like **Cancer,** Skin and other respiratory infections. The Report of the Joint Director of Health Services, **Morigaon** had clearly referred about probable negative impact of such a coal based industry in the said location. All the households of the Sativeti village are not ready to accept a pollution causing kiln within a radius of nearly 500 mtr from our village.
2. That the brick kiln is proposed amidst of our arable agricultural land. Rise of temperature due to burning coal and **use of top soil** for preparing bricks will affect the agricultural production and livelihood of the surrounding farmers.
3. That, the industrialist has been trying to create an industrial zone amidst of the Pobitora Wild life Sanctuary as it is proposed amidst of the 2 blocks of the Pobitora wild life Sanctuary. The inter space between the Plain Block (**Rajamayong Block**) and Hill Block (**Burhamayong Hill Block**) of the Pobitora Wildlife Sanctuary has its unique significance to protect

Pollution Control Board, Assam

the Bio- diversity of the Pobitora Wild life sanctuary. The interspace between the two blocks of the sanctuary was incorporated in the draft proposal of Eco Sensitive Zone to provide safe passage to the straying Rhinos, Buffalos, Boar and Leopards etc. But, the final notification is yet to be published. Taking the delay as an opportunity he is trying to create industrial belt in the interspace of the sanctuary. Hence, such a pollution causing industry proposed amidst of the two blocks will certainly affect the Bio diversity of the area and it is contrary to the wildlife conservation ethos of the nation. Therefore, we request for your kind intervention to prohibit industrial belt amidst of the 2 blocks of the Pobitora WL Sanctuary.

Therefore, we request your honour kindly to give necessary direction to the **DC, Morigaon** to prohibit the proposed brick kiln in the said location. Sir, we will remain thankful to you for your kind endeavor to protect our fundamental right to live in a pollution free environment and to preserve the rich bio diversity of the region.

Yours Faithfully

REPORT ON PROPOSED CONSTRUCTION OF BRICK INDUSTRY
ON AGRICULTURAL LAND AT SATIVETI, MAYONG

In response of complain lodged by the local farmers and the KMSS. I along with Sri Nitai Ch Das SDAO Morigaon, Sri Habibul Haque Sr. ADO, Morigaon, Sri Manabendra Sharma ADO Rajamayong, Sri P Naha VLEW, Mayong paid field verification at the site of proposed construction of brick industries on 13th Oct/2011

Findings:-

More than 100 no of villagers all belong to farming community from the neighbouring villagers gathered at the site of proposed brick industry. In presence of this mass a physical verification was conducted & evaluated as follows:-

1. The land on which a private party attempted to construct the industry is solely an agricultural land
2. Although the land is low land and falls under flood prone category still the farmer use to cultivate Boro paddy and procure a good harvest. It is observed that there are several old shallow boring uses to lift the ground water to irrigate Boro paddy
3. Farmers of the adjacent plot of land to the proposed industry expressed their resentment that their livelihood would be badly affected by this industry

Probable after affect:-

1. After setting up the brick industry, the productivity of Boro paddy of the adjacent plot will significantly drop down
2. Temperature of surrounding areas will increase and as a result crop may be affected
3. Pollution of surrounding areas would create health hazard
4. Emission of smoke containing carbon may often settle down to the soil, as result of which C:N ratio increases and may affect crop yield as well as soil health

From above it is suggested that such kind of industry should not be allowed on the productive agricultural land and inhabited areas.

As reported by **Morigaon District Agriculture Department** dated 10-2-2012 setting up of M/S Bhavani Bricks(B.B.A. Bricks) in the Sengmari kissam, vill- Sativeti,P.O.- Rajamayong , the soil of the cultivating area will be hardened and degraded. The agricultural field will be damaged and in the same time it will cause several health problems in the surrounding area. The different types of diseases which may occur from such a coal based industry are as follows.....

- (1) Nutritional disorders like Anemia & kuashirkar.
- (2) Pollution of the air will lead to Respiratory illness (Asthma etc.)
And skin diseases.
- (3) Migratory workers may lead to social tensions.
- (4) Vector borne diseases may increase as the area is flood affected and deep ~~and~~ trenches may led to water logging.

Report on Brick Industry under construction at Sativeti Village of Morigaon District

As per request made by Sativeti Nava Milan Sangha & Puthibharal of Morigaon District, the undersigned along with Dr. Dwijen Sarma, VAS, State Vety Dispensary, Jhargaon visited the setting up Brick Kiln named 'Bhabani Brick Industry' on dated 31st January'13. On our visit we found the following--

Location - The Brick Industry is surrounded by paddy field and is located in the village Sativeti, on the left side of the Mayong- Guwahati Road. It is under Mayong Circle and is about 100 metres away from the said P.W.D road.

Remarks - Data collected from different sources reveal that emissions during burning of various fuels in Brick Industry contains large amount of Carbon Dioxide and also produces Black Carbon which may indirectly cause health problems among different group of animals.

Sir,

With reference to the above I would like to inform you that on the basis of the letter dated 25.04.2013 quoted under reference, I have caused a field enquiry of the site of the brick kiln at Sativeti area on 1.05.2013. That sir, the kiln authority has set up a complex of their own by constructing the CHULA and labour huts etc. as I have observed during my field visit. The spot of the kiln is found to be surrounded by paddy field of the nearby villagers and it is about 500 meters away from the boundary of the Rajamayong hill point of Pobitora Wildlife Sanctuary. Hence, the site falls within the proposed eco-sensitive zone of the Protected Area. Moreover, I could see some water bodies there in the nearby area of the kiln, where migratory and indigenous birds might be seen in the season. In the context, I would like to draw your attention that, the area of the site is very much on the corridor of the straying rhinos which strays towards the hill side during the flood time. Setting up such brick kiln in that area must obstruct its regular corridor and may cause other complexity also. That sir, this letter may be treated as the reply to your letter under reference also.

As such, your honour is requested to take up necessary steps against such activities for the interest of the conservation of the wildlife.

This is for favor of your kind information and necessary action.

Sub : Regarding setting up of a brick kiln in adjacent to the Wildlife Sanctuary.

Madam ,

Most respectfully , I beg to inform you that two brick kilns are seen establishing one at Sativeti and the other in opposite to the Dhekiabari anti poaching camp on the solution side Guwahati - Mayang PWD Road under Mayang Revenue Circle of Morigaon District .

The location of the said brick kilns are very much within half a kilometer from the boundary of the Raja Mayang Hill RF which is a part of the notified Pobitora Wildlife Sanctuary . Moreover , the sites fall within the proposed Eco Sensitive Zone of the Pobitora Wildlife Sanctuary and on the animal movement corridor.

Setting up of such coal based industries in close to the boundary of the wild life sanctuary will certainly have immense adverse effect to both the flora & fauna and its natural environment .

Under the circumstances, may I request your honour to kindly immediate necessary measures to stop setting up of the brick kilns in Eco Sensitive Zone for the greater interest of the wildlife Sanctuary and its natural environment.

INSPECTION REPORT

As directed by the Hon'ble Chairman, Pollution Control Board, Assam, M/s. Bhabani Brick Industry has been inspected and findings are as follows:-

1. Name & Address of the unit : M/s. Bhabani Brick Industry, (BBA),
Vill.: Sativeti, Chengmai Kissam,
P.O.: Rajamayong,
Dist.: Morigaon, (Assam).
2. Date & time of inspection : 11/12/12, at 3 P.M.
3. Name of the proprietor : Sri Dilip Chetry.
4. Location of the unit : The unit is located in the village sativeti & on the right hand side of Guwahati- Mayong P.W.D. Road and about 100 mtrs, away from the P.W.D. Road. The area falls under Mayong Revenue Circle. The unit is located within a ½ km, from the boundary of the Rajamayong Hill Reserve Forest which is a part of the notified Pabitora Wild life Sanctuary. Also falls within the proposed Eco-Sensitive Zone of the Pabitora Wild life Sanctuary and on the animal movement corridor.
5. Chimney Height : The unit has already constructed fixed Chimney of height about 100 ft, and rectangular shaped.
6. Findings : During inspection findings are as follows:-
 - (i) Making of raw bricks is going on in full swing.
 - (ii) Preparation for mixing of raw materials is going on.
 - (iii) Raw bricks are kept in stack for drying.
 - (iv) The labour contractor has informed that, making of raw bricks has been started from last 20 days.
 - (v) As informed by the labour contractor, at present, there are 75 nos. of labour engaged in the unit.
 - (vi) Small thatched hut for the labourers has been seen in one side of the unit.
 - (vii) During the time of inspection, about 1,00,000 pieces of raw bricks have been seen ready and kept in stack.
 - (viii) Raw bricks are not yet burned in the kiln.
 - (ix) The unit is surrounded by paddy fields.
 - (x) Though, at present, no any paddy cultivation has been seen but, land has been prepared for paddy cultivation (Boro paddy).
 - (xi) Local farmers have alleged that, the brick manufacturing unit has encroached some part of the surrounding paddy fields and use its top soil in making of raw bricks.
7. Remarks : Running of a brick manufacturing unit in the above said location will have an adverse effect on the surrounding paddy fields as well as in the environment of the area. The smoke emitted from the chimney will cause health problems to the local people and also to the animal life. The rising temperature of the kiln will damage the soil property of the nearby paddy fields.

বহু বনাকলৰ মাজত ইটাভাটা গঠি কুৰিবলৈ বিচৰা কৰিব আৰু তীব্ৰ বিৰোধিতা
কৰিছো আৰু আপোনাক অনুৰোধ কৰাৰ্থে মাতে কোনোগৰোৱেই পবিত্ৰতা অভয়াৰণ্যৰ
হুতি হোৱা কামৰ আপুনি মহযোগ্য কৰে। পবিত্ৰতা অৰণ্য নিজেই কাষত হোৱা বাবে
ইটাভাটাত ব্যৱহিত কৰাৰ হোঁৱাই অভয়াৰণ্যৰ তীব্ৰ অক্ষয়ৰ কাৰক হুতি কৰিব কুৰি
মহজে অনুমতি। অশা ৰাখিছো আপুনি বধ্যমথ বাবেয়া গ্ৰহণ কৰি আৰু অধিক সংগ্ৰামৰ
পৰলৈ ৰাইজৰ লগতে আমাকো তেঁপি সিদিব।
